

Marlin Cruiser

The compact camper trailer, perfect for touring the open roads

The **Marlin Cruiser** is quickly becoming one of Australia's most popular camper trailers, and it's easy to see why- Perfectly **suit**ed for couples, the quick & easy set up allows you to getaway for a weekend or longer touring holiday. The **Marlin Cruiser** has been specifically designed so it can be set up by a **single person in under a minute**. This allows you to set up with ease, then sit back and enjoy your surroundings.

A heavy duty, semi-off road trailer gives you strength and reliability, yet the **Marlin Cruiser** still weighs in at just **280kg**. The camper trailer's low towing profile means you don't lose rear-window visibility from your vehicle, and won't stack extra dollars onto your fuel bill.

"Off The Beaten Track"- In Total Comfort:]The comfy double bed (including a 100mm high density open cell foam mattress) gets you sleeping up off the floor, ensuring a good nights' rest. If you've always loved camping, but setting up a tent has lost its' appeal, then the **Marlin Cruiser** is for you! Large windows provide plenty of light and ventilation throughout, and all are equipped with midgy-proof screens. Our camper trailers are made with heavy- duty, water- proofed canvas, and the roof has a silver laminate to reflect the sun's rays and ensure your camper stays cool and comfortable in all seasons.

The **Marlin Cruiser** has a large sleeping area, 1800 x 2000 mm, and comes with its own, **high-density, open-cell foam mattress**. This makes it easy to keep clean and (more importantly) supports you throughout the night.

The Marlin Cruiser: Built Tough

Our **Heavy Duty 6x4 trailers** are constructed from BHP steel, and have been customised specifically for camping. We include a

checker plate floor and seam weld design, **engineered to add strength and durability to your camper**. Other standard features include the swing up jockey wheel at the front and the Alco heavy duty drop down leg at the rear so that keeping you level is done quickly and easily.

The **Marlin Cruiser** has a low profile, non-intrusive base board design that allows you maximum storage space in your trailer. There's also a built-in hatch underneath the mattress for access to storage areas, with the option to add a gas strut and hinges to improve access under the camper trailer base.

The large front awning can be turned into a useful sheltered area with the addition of a windbreak or sunroom, available as an optional extra.

R.R.P: \$4550
