

## Which Camper Trailer Is Right for You?

Buying a Camper Trailer with Marlin Campers- it's as easy as 1-2-3

Our team here at Marlin are life- long campers and adventurers. We're constantly using, changing and improving our range and through doing so, realise there's not a one-size-fits-all-solution that suits every customer.

So while other manufacturers might import off- the- shelf products, we will continue building our entire range of camper trailers in-house, from the ground up, and have done so ever since we first opened back in 2006.

**On top of that, if you've bought a camper trailer before you know how frustrating it is to have to purchase it as it comes-stock-standard, paying for items you either:**

a) Don't want or,

b) Already have and don't need

**However with any Marlin Camper you buy, you get to choose:**

What size tent you would like?

What features do you need added now and are likely to want in future?

Do you need an On Road, Light Off Road or Extreme Off Road Trailer?

Take a look how easy it is to find your perfect fit with our 3 step process below:

1. Which tent fits your needs?

By using the Oztrail range of tops you're guaranteed to find a Camper that's perfect for you. We've split the range into 3 areas.

[The Marlin Cruiser Range](#)

This is for those of you after a small, compact and easy to set up camper. Great for singles and couples, this camper is also perfectly suited for small car towing. The tare weight comes in at just 280kg.

### [The Marlin Escape Range \]](#)

For couples and small families looking for a bit more room in the trailer, without going too big on the tent. It's our most popular Off Road model as its' small footprint allows you to go anywhere and set up in the smallest of places.

### [The Marlin Explorer Range\]](#)

The ideal Family Camper, these campers offer plenty of space with optional rooms that can be added for those getaways when the kids bring their mates along.

Below is the Explorer with the Oztrail Zenith tent. This unit has an optional Rear kids room that is attached, similar to the front awning.

## 2. Choose your trailer.

The biggest decision to make is whether you need a Semi Off Road or Full Off Road Model.

**Other options include:**

Toolboxes

Jerry Can Holders

Gas Bottle Holders

Boat Racks

And the list goes on...

Every trailer is built specifically to your needs so you get exactly what you want with no unnecessary extras. If you're a new camper, this means you also have the opportunity to start using your Camper Trailer and find out what works best for you as you go along.

### 3. What goes inside.

When we started Marlin Campers, we wanted a camper trailer that had a top quality, easy- to- use tent on a solid trailer that could be used for storing camping gear we already owned.

While every other manufacturer is apparently busy loading their campers with as much gear as possible, we keep ours empty. This means you have the choice to add only what you need and leave out what you already own.

### **After all, why should you pay for what you don't want?**

Some people want a tailgate kitchen that's as good as their kitchen at home, others are happy with a table outside next to the BBQ. It's with this "made to match" approach in mind that the final step to buying your camper is adding the furniture and accessories that make your camper trailer the perfect one for you.

We'd love to help you while you search your way through the maze of campers available in today's market.

A quick call or email and a couple of questions is all it takes to find your perfect match.
