Compact Camper Trailer perfect for touring the open roads

The Marlin Cruiser is the ultimate in **lightweight camper trailers**, and is quickly becoming one of Australia's favourite camper trailers.

Perfectly **sited for couples**, its quick & easy setup will allow you to get away for a weekend or for a longer touring holiday.

The Marlin Cruiser has been specifically designed so that it can be erected by a **single person in under a minute**, meaning that more time is spent enjoying your surroundings, and less time is spent setting up.

A heavy duty, semi-off road trailer gives you strength and confidence, but the Marlin Cruiser still weighs in at just 280kg. The camper trailer's low towing profile means you won't lose any visibility from your car, and you won't add dollars to your fuel bill.

The comfy double bed, including a 100mm high density open cell foam mattress, gets you up off the floor and ensures a great night's sleep. If you have always loved camping, but setting up a tent has lost its appeal, the Marlin Cruiser is for you. Plenty of large windows provide light and ventilation, and all have midgy proof screens. Our camper trailers are made with heavy duty, water proofed canvas, and the roof has a silver laminate to reflect the sun and keep your camper cool and comfortable all year round.

Our **Heavy Duty 6x4 trailers** are built using BHP steel, and have been customised specifically for camping. We include a checker plate floor and seam weld design **engineered to add strength and durability to your camper**. Other standard features include the swing up Jockey wheel at the front and the Alco heavy duty drop down leg at the rear so that keeping you level is quick and easy.

The Marlin Cruiser has a large sleeping area, 1800x2000 mm, and is supplied with its own **high-density open-cell foam mattress**. This means it's easy to keep clean and more importantly will support you throughout the whole night.

The Marlin Cruiser has a low profile non-intrusive base board design, which leaves you with maximum storage space in your trailer. There is a built-in hatch underneath the mattress for access to storage areas, and we can add a gas strut and hinges to improve access under the camper trailer base.

The large front awning can be turned into a useful sheltered area with the addition of a windbreak or sunroom available as an optional extra.

R.R.P \$4550
